

Comments:

The team was able to successfully achieve the goals for this sprint. This can be seen the red line being below the grey line on Feb 26. However, the red line being above the grey line for the majority of the duration of the sprint indicates that the team was behind schedule and had to cram in work towards the end of the sprint.

Velocity Comparison:

Sprint 1 Velocity: 43

Sprint 2 Velocity: 68

Why did velocity change?

- We encountered bugs in the application from Sprint 1 and chose to incorporate those in Sprint 2, to prevent bugs from accumulating and causing additional unexpected behavior. This led to an increase in Sprint 2 velocity.
